

Matching Evaporator Coil Models with the Rinnai Hydronic Furnace

This bulletin has been prepared to assist with matching AC coils and condensing units with the Rinnai air handler (hydronic furnace). This bulletin should be used as a guide only and the suitability and selection of any equipment is the responsibility of the specifying engineer.

Table 1 shows through-the-wall condensing units from 3 manufacturers. Use this table to find the appropriate model, for use in a multi-family application in conjunction with the Rinnai Hydronic Furnace.

Table 2 shows the dimensions and CFM (cubit feet per minute) of coil models from various manufacturers. Use this table to locate pairings of Rinnai Hydronic Furnace and evaporator coil model which are compatible.

DISCLAIMER:

The information contained herein is accurate and complete to the best of our knowledge and belief at the time of publication. However, these manufacturers may change and update their models without notification so you must check their specifications before making a final pricing determination. The information in this bulletin was provided to assist you in installations, however, final determination of the suitability of any equipment is the sole responsibility of the design engineer and or installer. Rinnai Corporation, or any of its subsidiaries assumes no liability whatsoever for the accuracy or completeness of the information contained herein and is not responsible for any installation or choice of coil.

Given that all equipment listed are manufactured 'by-others' and may be selected as conceivable match(es) for a particular Rinnai Hydronic Furnace, please understand that these selections were based on the respective cooling coil capacity, required air flow (CFM) and physical dimensions. Rinnai is NOT stating or implying that this information has been sanctioned by any respective manufacturer whose equipment is listed.
